

MANAGEMENT'S DISCUSSION AND ANALYSIS

The following Management's Discussion and Analysis (MD&A) is dated November 14, 2011, for the six month period ended September 30, 2011 and should be read in conjunction with the Company's accompanying condensed consolidated interim financial statements for the same period and the audited consolidated financial statements and the MD&A for the year ended March 31, 2011.

As at April 1, 2011, the Company was mandated under National Instrument 52-107 to change its accounting and reporting principles to International Financial Reporting Standards ("IFRS"). The condensed consolidated interim financial statements for the six months ended September 30, 2011 have been prepared in accordance with IAS 34, Interim Financial Reporting ("IAS 34"), as issued by the International Accounting Standards Board, and its interpretations. Accordingly, the accounting policies set out in Note 2 of the condensed consolidated interim financial statements have been applied consistently to all periods presented in preparing the opening balance sheet at April 1, 2010 (see note 15) for purposes of transition to IFRS. Results for the period ended September 30, 2011, are not necessarily indicative of future results.

Forward Looking Statements

The MD&A contains forward-looking statements within the meaning of securities laws, including the "safe harbour" provisions of Canadian securities legislation. Forward-looking statements and information concerning anticipated financial performance are based on management's assumptions using information currently available. Material factors or assumptions used to develop forward-looking information include drilling programs and results, facility and pipeline construction operations, potential business prospects, growth strategies, the ability to add production and reserves through development and exploration activities, the ability to reduce costs and extend commitments, projected capital costs, government legislation, well performance, the ability to market production, the commodity price environment and quality differentials and exchange rates. Management also assumes that the Company will continue to be able to maintain permit tenures in good standing, that the Company will be able to access equity capital when required and that the Company will maintain access to necessary oil and gas industry services and equipment to conduct its operations. Although management considers its assumptions to be reasonable based on these factors, they may prove to be incorrect.

Forward-looking information is often, but not always, identified by the use of words such as "anticipate", "assume", "believe", "estimate", "expect", "forecast", "guidance", "may", "plan", "predict", "project", "should", "will", or similar words suggesting future outcomes. Forward-looking statements in this MD&A include, but are not limited to, statements with respect to: an increase in cash flow, reserves and reserve values through a properly executed development plan at Cheal and Sidewinder, including maximizing the value at Cheal through the implementation of further optimization operations and additional successful drilling; anticipated revenue from the Cheal oil field; converting the undiscovered resource potential to proved reserves within the East Coast Basin; capital expenditure programs and estimates including those set out herein under "Use of Proceeds"; and the impact of the transition to International Financial Reporting Standards ("IFRS") on the Company's financial statements.

Because forward-looking information addresses future events and conditions, it involves risks and uncertainties that could cause actual results to differ materially from those contemplated by the forward-looking information. These risks and uncertainties include, but are not limited to: access to capital, commodity price volatility; well performance and marketability of production; transportation and refining availability and costs; exploration and development costs; the recoverability of reserves; reserves estimates and valuations; the Company's ability to add reserves through development and exploration activities; accessibility of services and equipment, fluctuations in currency exchange rates; and changes in government legislation and regulations.

The forward-looking statements contained herein are as of November 14, 2011, and are subject to change after this date. Readers are cautioned that the foregoing list of factors that may affect future results is not exhaustive and as such undue reliance should not be placed on forward-looking statements. Except as required by applicable securities laws, with the exception of events or circumstances that occurred during the period to which the MD&A relates that are reasonably likely to cause actual results to differ materially from material forward-looking information for a period that is not yet complete that was previously disclosed to the public, the Company disclaims any intention or obligation to update or revise these forward-looking statements, whether as a result of new information, future events or otherwise.

BOEs may be misleading, particularly if used in isolation. A BOE conversion ratio of 6 Mcf:1bbl is based on an energy equivalency at the burner tip and does not represent a value equivalency at the wellhead.

Undiscovered Hydrocarbon-In-Place (equivalent to undiscovered resources) is that quantity of petroleum that is estimated, on a given date, to be contained in accumulations yet to be discovered. There is no certainty that any portion of the undiscovered resources will be discovered or that, if discovered, it will be economically viable or technically feasible to produce.

Exploration for hydrocarbons is a speculative venture necessarily involving substantial risk. TAG's future success in exploiting and increasing its current reserve base will depend on its ability to develop its current properties and on its ability to discover and acquire properties or prospects that are capable of commercial production. However, there is no assurance that TAG's future exploration and development efforts will result in the discovery or development of additional commercial accumulations of oil and natural gas. In addition, even if further hydrocarbons are discovered, the costs of extracting and delivering the hydrocarbons to market and variations in the market price may render uneconomic any discovered deposit. Geological conditions are variable and unpredictable. Even if production is commenced from a well, the quantity of hydrocarbons produced inevitably will decline over time, and production may be adversely affected or may have to be terminated altogether if TAG encounters unforeseen geological conditions. TAG is subject to uncertainties related to the proximity of any reserves that it may discover to pipelines and processing facilities. It expects that its operational costs will increase proportionally to the remoteness of, and any restrictions on access to, the properties on which any such reserves may be found. Adverse climatic conditions at such properties may also hinder TAG's ability to carry on exploration or production activities continuously throughout any given year.

The significant positive factors that are relevant to the estimate contained in the independent resource assessment are:

- proven production in close proximity;
- proven commercial quality reservoirs in close proximity; and
- oil and gas shows while drilling wells nearby.

The significant negative factors that are relevant to the estimate contained in the independent resource assessment are:

- tectonically complex geology could compromise seal potential; and
- seismic attribute mapping in the permit areas can be indicative but not certain in identifying proven resource.

Business

TAG Oil Ltd. is a Canadian-based oil and gas producer and explorer with assets consisting of more than 1.7 million acres of land onshore in the Taranaki and East Coast Basin's of New Zealand and 15,408 net acres (77,039 gross acres) offshore in the Taranaki Basin of New Zealand at September 30, 2011. TAG is poised to grow through profitable operations, acquisitions and development and exploration drilling. TAG remains in a strong financial position, with sufficient working capital to fund operations and meet all commitments for the foreseeable future.

At the date of this report there are twelve wells producing or capable of producing at the Cheal oil and gas field ("Cheal") and four wells capable of producing at the Sidewinder oil and gas field ("Sidewinder").

TAG believes that a properly executed development plan will allow for an increase in cash flow, reserves and reserve values through further drilling in the Taranaki basin on TAG's 100% owned and operated Cheal, Cardiff and Sidewinder oil and gas fields while the Company's 20% interest in the Kaheru prospect offshore in PEP 52181 offers a significant amount of resource potential to pursue in Taranaki during the next few years.

The Company also intends to achieve its goal of converting the undiscovered resource potential within the Company's three permit interests located in the East Coast Basin to proved reserves through an aggressive drilling campaign.

Summary of Quarterly Information

The Company's accompanying condensed consolidated interim financial statements ("financial statements") were prepared in accordance with IAS 34 Interim Financial Reporting ("IAS 34"). These are the Company's second International Financial Reporting Standards ("IFRS") financial statements as the Company previously prepared its financial statements in accordance with Canadian generally accepted accounting principles. Please refer to Notes 2 and 15 of the accompanying condensed consolidated interim financial statements for further information.

Standard of Preparation	2012		2011				2010	
	IFRS	IFRS	GAAP	GAAP	IFRS	IFRS	GAAP	GAAP
	Q2 \$	Q1 \$	Q4 \$	Q3 \$	Q2 \$	Q1 \$	Q4 \$	Q3 \$

Diluted income (loss) per share	0.02	0.00	(0.01)	(0.01)	(0.00)	(0.00)	(0.03)	0.02
Production (boe/d)	824	695	574	544	459	328	308	345
Capital expenditures	6,302,996	13,463,042	9,567,556	7,026,048	3,279,353	2,181,126	711,325	5,390,160
Cash flow from operations (1)	3,532,581	2,754,287	1,711,461	570,098	572,513	340,787	(218,123)	590,512

(1) Cash flow from operations is a non-GAAP measure. It represents cash flow from operating activities before changes in working capital

The Company recorded net income for the second quarter of \$894,167 compared to a loss of \$217,857 for the same period last year. For the six months ended September 30, 2011, the Company recorded net income of \$1,162,666 compared with a net loss of \$374,435 for the same period last year.

Increased revenues for the quarter are due to higher oil prices, and increased daily production rates provided by successful drilling activity and optimization, principally in the Cheal field.

The Sidewinder field was brought into production for long-term testing on September 22, 2011 and initial flow rates for Sidewinder-1 added an average of 1,038 boe per day for the 9 days of production in the quarter. Production from the Sidewinder field is expected to increase as Sidewinder 2, 3 and 4 are tied into the production facilities in the third quarter of fiscal 2012.

TAG continues to have a strong capital program based around continued drilling success with two wells in the current ten well campaign drilled in the current quarter and awaiting testing and the third well has spudded. The Sidewinder production facility was completed on time as the Company fast tracked the Sidewinder field into production.

Results of Operations

Oil and Natural Gas Production, Pricing and Revenue

	Six months ended				
	2012 Q2	2012 Q1	2011 Q2	2012 Q2	2011 Q2
Daily production volumes ⁽¹⁾					
Oil (bbls/d)	665	621	364	643	330
Natural gas (boe/d)	159	74	95	117	64
Combined (boe/d)	824	695	459	760	394

Royalties	(1,974,596)	(1,774,096)	(721,355)	(3,748,692)	(1,267,748)
Oil and natural gas revenue - net	\$5,402,581	\$4,079,005	\$1,691,978	\$9,481,586	\$2,959,315

(1) Natural gas production converted at 6 mcf:1boe (for boe figures)

The Company's production revenue from oil and gas sales increased 206% in the second quarter 2012 to \$7,377,177 compared to \$2,413,333 for the same quarter in 2011 as a result of:

- A 41% increase in oil prices from \$79.29 in the second quarter of 2011 to \$112.02 in the second quarter of 2012.
- A 143% increase in daily sales volume (on a boe basis).
- First revenue from the Sidewinder field began on September 22, 2011. Initial production from Sidewinder-1 averaged 1,038 boe's per day. As of the date of this report Sidewinder-1 and Sidewinder-3 are currently producing.
- Currency variations from oil sold in US\$ and natural gas sold in NZ\$.

Daily production volumes increased 19% to 824 boe per day for the second quarter of 2012 from 695 boe per day in the first quarter of 2012.

For the six months ended September 30, 2011, daily production increased 93% to 760 boe per day from 394 boe per day for the same period in 2011. The increase in production is due to successfully drilling, completing and producing the Cheal-BH1 and Cheal-B4ST wells along with optimization activities at the Cheal oil and gas field.

Sidewinder production from the Sidewinder-1 well began late in the second quarter and additional Sidewinder wells will be tied-in to the Sidewinder production facilities in the third quarter of fiscal 2012, increasing Sidewinder production rates significantly.

Production by area (boe/d)	Six months ended				
	2012 Q2	2012 Q1	2011 Q2	2012 Q2	2011 Q2
Cheal	722	695	364	709	394
Sidewinder	102	-	571	51	-
	824	695	935	760	394

Production from Sidewinder averaged 1,038 boe/day (5,971 mmcf/day and 43 bbl of oil per day) beginning on September 22, 2011.

Production from the Cheal field has increased from 364 boe/day in the second quarter of 2011 to 722 boe per day in the second quarter of 2012. Enhancements to Cheal's artificial lifting system are in progress and additional production from shut-in wells will contribute to more daily production in combination with anticipated new production from the Company's Cheal-C1, Cheal-C2 and Cheal-A8 wells that will be tested in the third quarter of fiscal 2012.

Since the Company acquired its interest in PMP 38156 in September 2006, the Cheal oil field has produced 763,379 barrels of oil to September 30, 2011. From November 2004 to September 30, 2011, however, the Cheal oil field has produced 856,253 barrels of oil.

Royalties

	Six months ended				
	2012 Q2	2012 Q1	2011 Q2	2012 Q2	2011 Q2
Royalties	1,974,596	1,774,096	721,355	3,748,692	1,267,748
As a percentage of revenue	27%	30%	30%	28%	30%

Royalties increased 174% from \$712,355 in the second quarter of 2011 and by 11% from \$1,744,096 in the first quarter of 2012, to a total of \$1,974,596 for the second quarter of 2012. The increase reflects higher revenues during the 2012 fiscal year. However the royalty as a percentage of revenue has decreased from 30% recorded in the first quarter of 2012 to 27% in the second quarter of 2012 as the royalties payable on Sidewinder production are less than those payable for Cheal.

Royalties consist of the following:

- a. Crown royalty payments of 5% on net oil and gas proceeds received during the period ending September 30, 2011.
- b. Cheal royalties relate to a 25% royalty paid on net oil proceeds from Cheal as part of the Company's agreement to acquire Austral's 69.5% interest in the Cheal oil and gas field. The Cheal overriding royalty agreement requires TAG to pay a 25% royalty on net sales revenue on the first 500,000 barrels of oil produced from the date of acquisition and then dropping to a 7.5% royalty on net sales revenue thereafter. At September 30, 2011, 363,485 (2011: 155,755) barrels of oil had been produced from the date of the Cheal acquisition leaving 136,515 (2011: 344,245) barrels of production required before the royalty reduction to 7.5%.
- c. Sidewinder royalties relate to a 5% royalty paid on net oil proceeds from Sidewinder as part of the Company's agreement to acquire Austral's 66.67% interest in the PEP 38748 permit. The Sidewinder overriding royalty agreement requires TAG to pay a 5% royalty on net sales revenue on the first 200,000 barrels of oil produced from the date of acquisition and then dropping to a 2.5% royalty on net sales revenue thereafter. At September 30, 2011, 386 (2011: nil) barrels of oil had been produced from the date of the PEP 38748 permit acquisition leaving 199,614 (2010: 200,000) barrels of production required before the royalty reduction to 2.5%. Sidewinder royalties also include a 3.33% royalty on net oil and gas proceeds payable to a previous partner.

Production, transportation and storage costs

	Six months ended				
	2012 Q2	2012 Q1	2011 Q2	2012 Q2	2011 Q2
Production costs	868,310	426,944	480,285	1,295,254	888,998
Per boe (\$)	11.46	6.75	11.37	9.31	12.33
Transportation and storage costs	510,511	396,175	230,783	906,686	396,015
Per boe (\$)	6.74	6.26	5.46	6.52	5.49

The increase in production costs in the second quarter of 2012 is due to initial expenditures at Sidewinder for start up operations and TAG's planned bi-annual plant maintenance shutdown at Cheal. Production costs per boe of \$9.31 for the six months ended September 30, 2011 are 25% lower than the corresponding period last year as a result of higher production volumes from the Cheal oil and gas field.

Transportation and storage costs are incurred to move marketable oil and condensate to their selling points and include trucking oil and condensate to the facilities at the New Plymouth port, storage at the port facilities and shipping costs associated with transporting oil and condensate to international refineries. Transportation and storage costs have increased from \$5.46 per boe (six months: \$5.49) in the second quarter of 2011 to \$6.74 (six months: \$6.52) per boe in the second quarter of 2012. This increase is due to higher fuel costs for trucking product and higher shipping costs from the port to refineries.

Operating Netback

(\$/boe)	Six months ended				
	2012 Q2	2012 Q1	2011 Q2	2012 Q2	2011 Q2
Revenue	99.80	107.96	79.29	103.26	77.14
Royalties	(26.05)	(28.04)	(17.07)	(26.96)	(17.58)
Transportation and storage costs	(6.74)	(6.26)	(5.46)	(6.52)	(5.49)
Production costs	(11.46)	(6.75)	(11.37)	(9.31)	(12.33)
Netback per boe	55.56	66.92	45.39	60.47	41.73

The second quarter netback of \$55.56 per boe is a 22% increase from the \$45.39 per boe reported in the same quarter in 2011 and is primarily due to increased realized oil prices in the second quarter of 2012. The 17% decrease in the second quarter 2012 netback per boe from the first quarter of 2012 is due to lower realized oil prices and increased production costs as a result of scheduled bi-annual facility maintenance shut-down at Cheal during the quarter.

The netback of \$60.47 for the six months ended September 30, 2011 results in a 45% increase on the netback of \$41.73 recorded for the same period last year due to higher realized oil prices, along with lower production costs in the second quarter of the 2012 fiscal year.

Emissions Trading Scheme

	Six months ended				
	2012 Q2	2012 Q1	2011 Q2	2012 Q2	2011 Q2
Emmissions trading scheme	53,531	33,646	22,438	87,177	22,438

On July 1, 2010, the Company entered the transition period for the New Zealand Emissions Trading Scheme (ETS). The transition period which operates through December 31, 2012, caps on the price of New Zealand Emissions Units (NZUs) at NZ\$25 and one unit will only need to be surrendered for every two tonnes of carbon dioxide equivalent emissions, effectively reducing the carbon price to NZ\$12.50 per tonne. The Company incurred \$53,531 (six months: \$87,177) in ETS costs from the Cheal and Sidewinder oil and gas fields for the quarter ended September 30, 2011 compared to \$22,438 (six months: \$22,438) for the three months ended September 30, 2010. The increased costs are as a result of higher gas production at Cheal and the addition of the Sidewinder field.

Insurance

	Six months ended				
	2012 Q2	2012 Q1	2011 Q2	2012 Q2	2011 Q2
Directors and officers insurance	14,581	13,892	8,750	28,473	21,917
Insurance	87,076	67,219	48,298	154,295	87,862
	101,657	81,111	57,048	182,768	109,779
Per boe (\$)	1.34	1.28	1.35	1.31	1.52

The Company incurred \$87,076 (six months: \$154,295) of insurance costs in the second quarter ended, September 30, 2012 compared to \$48,298 (six months: \$87,862) in the prior year. The increased insurance costs are a result of the Sidewinder facilities and pipeline insurance costs.

General and Administrative Expenses

	Six months ended				
	2012 Q2	2012 Q1	2011 Q2	2012 Q2	2011 Q2
Consulting fees	35,086	46,138	49,992	81,224	106,247
Directors fees	58,500	54,500	31,500	113,000	57,500
Filing, listing and transfer agent	249,494	25,458	29,781	274,952	47,622
Reports	4,382	51,004	-	55,386	8,306
Office and administration	102,415	65,065	58,200	167,480	101,098
Professional fees	100,851	45,699	34,693	146,550	77,776
Rent	43,095	27,319	24,180	70,414	49,388
Shareholder relations and communications	89,150	129,406	81,183	218,556	162,556
Travel	114,637	70,654	24,994	185,291	102,736

Overhead recoveries	14,112	(68,024)	(62,784)	(53,912)	(98,431)
	1,221,794	799,236	546,603	2,021,030	1,118,219
Per boe (\$)	16.12	12.63	12.91	14.53	15.51

As detailed above, the Company recorded costs of \$1,221,794 (six months: \$2,021,030) compared to \$546,603 (six months: 1,118,219) for the comparable quarter last year. The increase is a result of additional staff and corporate infrastructure to facilitate the ongoing operations and exploration programs being undertaken by the Company. In addition the Company incurred one-time costs associated with listing on the Toronto Stock Exchange during the second quarter.

Director fees have increased as a result of expanding activities related to operations, acquisitions and financing. Professional filing, listing and transfer agent fees have increased due to the Company listings on the Toronto Stock Exchange and the OTCQX.

Shareholder relations and communications have increased due to an increase in corporate activity.

Wages and salaries have increased with the appointment of a production and facilities manager to manage the Cheal and Sidewinder production facilities as well as administration staff.

Stock-based Compensation

	Six months ended				
	2012 Q2	2012 Q1	2011 Q2	2012 Q2	2011 Q2
Stock-based compensation	1,905,267	1,915,809	171,977	3,821,076	451,828
Per boe (\$)	25.14	30.28	4.07	27.48	6.27

Stock-based compensation costs are non-cash charges which reflect the estimated value of stock options granted. Please refer to Note 8 of the accompanying condensed consolidated interim financial statements.

The Company recorded stock-based compensation costs of \$1,905,267 (six months: \$3,821,076) for the second quarter ended September 30, 2011, compared to \$171,799 (six months: \$451,828) for the corresponding period last year. The cost related to the amortization of the fair value of stock options previously granted and as a result of new stock options granted in the current fiscal year.

Depletion, Depreciation and Accretion

	Six months ended

Depletion, depreciation and accretion	733,147	569,979	327,605	1,303,126	544,941
Per boe (\$)	9.67	9.01	7.75	9.37	7.56

Depletion, depreciation and accretion amounted to \$733,147 (six months: \$1,303,126) in the current year compared to \$327,605 (six months: \$544,941) in the corresponding period last year. The increase is a result of increased capital additions in the second quarter ended September 30, 2011.

Foreign Exchange (Gain) / Loss

	Six months ended				
	2012 Q2	2012 Q1	2011 Q2	2012 Q2	2011 Q2
Foreign exchange (gain) / loss	(699,797)	(210,049)	115,820	(909,846)	(132,605)

The Company recorded a foreign exchange gain of \$699,797 (six months: \$909,846) for the second quarter ended September 30, 2011, compared to a foreign exchange loss of \$115,820 (six months: \$132,605 gain) in the second quarter ended September 30, 2010. The foreign exchange gain for the quarter was caused by fluctuations of both the U.S. and New Zealand dollar in comparison to the Canadian dollar.

Interest Income

	Six months ended				
	2012 Q2	2012 Q1	2011 Q2	2012 Q2	2011 Q2
Interest income	186,006	202,345	41,546	388,351	65,863

Interest income of \$186,006 (six months: \$388,351) was recorded in the second quarter compared to \$41,546 (six months: \$65,863) in the corresponding period in the prior year. The increased revenue reflects the higher cash balances held in the year.

Results of Operations

	Six months ended				
	2012 Q2	2012 Q1	2011 Q2	2012 Q2	2011 Q2
Net income (loss)	894,167	268,499	(217,857)	1,162,666	(374,435)
Per share, basic (\$)	0.02	0.01	(0.00)	0.02	(0.01)
Per share, diluted (\$)	0.02	0.00	(0.00)	0.02	(0.01)

For the quarter ended September 30, 2011, the Company generated net income of \$894,167 compared to a net loss of \$217,857 in the comparable quarter in 2011 and net income of \$268,499 in the first quarter 2012. The higher income in 2012 is a result of increased production from Cheal and the addition of Sidewinder production along with higher realized oil prices received during the period.

	Six months ended				
	2012 Q2	2012 Q1	2011 Q2	2012 Q2	2011 Q2
Cash-flow from operations	3,532,581	2,754,287	572,513	6,286,868	637,283
Per share, basic (\$)	0.07	0.05	0.01	0.12	0.01
Per share, diluted (\$)	0.06	0.05	0.01	0.11	0.01

Cash-flow from operations increased in the second quarter 2012 to \$3,532,581 from \$572,513 in the same quarter in 2011 and \$572,513 in the first quarter of 2012. The higher cash-flow is a result of higher realized oil prices and increased production from Cheal and Sidewinder in the quarter.

Petroleum Property Activities and Capital Expenditures for the Three Months Ended September 30, 2011

During the quarter ended September 30, 2011, the Company incurred \$5,620,842 (2010: 1,544,991) worth of net expenditures on exploration and evaluation assets and \$3,538,983 (2010: 1,649,297) on its proved oil and gas properties. For the six months ended September 30, 2011, the Company invested \$13,123,967 (2010: \$1,724,639) in exploration and evaluation assets and \$6,384,399 (2010: \$3,562,841) in its proven oil and gas properties. The primary capital expenditures and activities during the quarter were as follows:

East Coast Basin:

At September 30, 2011, the Company controls a 100% working interest in three exploration permits totaling 1.73 million acres on the East Coast of the North Island of New Zealand. To date, the Company has acquired proprietary 2-D data, completed extensive geological surface and sub-surface studies, and has drilled a number of shallow stratigraphic test holes within the three permits. The goal of the Company's work to date is to determine if there is a viable shallow conventional oil play and to delineate and plan upcoming operations.

In the three months to September 30, 2011, the Company entered into a farmout agreement with Apache Corporation to explore, appraise and potentially develop the Company's East Coast Basin permits. During the quarter the Company has incorporated joint ventures for each of the east coast permits and has begun consultation with local Iwi, regional and district councils and landowners with initial planned operations consisting of:

- Initial exploration operations with seismic acquisition to take place in the third and fourth quarters of fiscal year 2012
- Access tracks will be constructed in the fourth quarter of the 2012 fiscal year with four vertical wells planned to begin drilling in April of 2012.

PEP 38348 (TAG 100%): \$515,412 (six months: \$864,204) of expenditures were incurred during the quarter related to the drilling of two shallow stratigraphic wells to approximately 250 meters that began during the 2011 fiscal year and some preliminary costs related to the 2D seismic survey

PEP 38349 (TAG 100%): \$141,444 (six months: \$358,873) of expenditures were incurred in the quarter related to field mapping and drilling a shallow stratigraphic well late in the 2011 fiscal year located on the Kawakawa Anticline.

PEP 50940 (TAG 100%): \$2,038 (six months: \$2,038) of expenditures were incurred in the quarter.

Taranaki Basin:

PMP 38156 - Cheal Oil and Gas Field (TAG 100%)

During the second quarter of the 2012 fiscal year, the Company has continued to focus on opportunities to optimize existing wells, preparation for testing of the Cheal-C1 well, and undertaking the next phase of drilling starting with the Cheal-C2 and Cheal-A8 wells.

The Company incurred \$3,538,983 (six months: \$6,384,399) worth of net expenditures in the quarter compared to \$1,649,297 (six months: \$3,562,841) in the comparable quarter last year. Expenditures incurred in the second quarter to September 30, 2011, include:

- Cheal-C2 was drilled to a depth of ~2,130 meters and encountered free oil within the Mt. Messenger Formation and the highest recorded gas kick encountered in the Mt Messenger Formation to date within the Cheal Field. Cheal-C2 well has been completed and will be flow tested using a temporary production set-up.
- Cheal-C1 testing operations are being prepared and will commence within the Mt. Messenger Formation where good porosity and free oil were encountered while drilling.
- New testing equipment has been acquired by TAG that will allow a long term test of the Cheal C site wells while the Company evaluates options to bring on long term production from the Cheal C site.
- The Cheal-A8 well has been drilled, cased and secured and will be tested following the Cheal-C2 and C1 tests. Cheal-A8 targeted the Urenui Formation and was drilled to a depth of ~1,480 meters and encountered free oil.
- The Cheal-B5 well targeting both the Urenui Formation and the Mt. Messenger Formation has initiated drilling operations as of the date of this report.

TAG continues its optimization program to increase production rates and recoverable reserves at Cheal with planning well advanced to:

- enhance the Cheal A-Site's artificial lift capacity to allow certain Cheal oil wells to be placed on permanent production.
- initiate the Cheal-A site waterflood program to increase recovery factors. Two workovers on historical, non-producing, wells will be performed and the waterflood implementation is expected to be completed in January 2012. Recovery factors of oil in place at Cheal are modeled to increase reserve recovery from 13% to approximately 25%.

PEP 38748 - Sidewinder Oil and Gas Field (TAG 100%)

During the later part of fiscal 2011 and in the six months to date the Company drilled, completed and tested four initial wells within the Sidewinder field. The Sidewinder permit remains lightly explored and is prospective for further oil and gas discoveries, with numerous drill-ready prospects already identified on extensive 3D seismic across the permit.

The Company fast-tracked the commercialization of the Sidewinder field with production facilities and pipelines now commissioned and the Company is now conducting a long-term production test of the Sidewinder wells. Three wells have been tied in on a temporary basis with construction of permanent tie-in pipework underway to allow for ongoing production from all four Sidewinder wells.

During the quarter the Company completed plans to acquire additional seismic within the Sidewinder Permit and will initiate the seismic acquisition in the third quarter of fiscal 2012. Planning, including landowner and council consenting, is underway as part of this 60 kilometer 2D seismic program to identify new independent sandstone lobes contained within the Sidewinder permit. New drilling locations identified with this seismic program are anticipated to be drilled in 2012 and 2013.

The Company incurred \$1,601,953 (six months: \$6,077,196) of expenditures during the quarter ended September 30, 2011 related to drilling, completion and testing operations at Sidewinder and to undertake planning for 2D seismic acquisition. This compares costs of \$1,441,414 (six months: \$1,532,970) invested in the quarter ended to September 30, 2010 related to drilling operations underway at that time.

The Company also recorded \$3,286,835 in costs (six months: \$5,622,547) related to the construction of the Sidewinder production station facilities and pipeline compared to \$nil (six months: \$nil) in the comparable period last year.

PEP 52181 - Kaheru Offshore (TAG 20%)

The Company's interest in the shallow offshore exploration permit PEP 52181 ("Kaheru") covers a 77,039 -acre area in the main Taranaki oil and gas discovery fairway. Kaheru is operated by a subsidiary of Australian-based Roc Oil Pty Ltd, is located in shallow water just 8 km from shore and in close proximity to existing infrastructure. PEP 52181 contains the large Kaheru Prospect and numerous other leads identified on, extensive 2-D and 3-D seismic coverage.

The Company incurred \$73,160 (six months: \$199,109) of expenditures during the September 30, 2011 quarter relating to reprocessing of seismic data and other G&G expenditures.

The Company has the following commitments for Capital Expenditure at September 30, 2011:

Contractual Obligations	Total \$	Less than One Year \$	More than One Year \$
Long term debt	-	-	-
Operating leases (1)	332,000	73,000	259,000
Purchase obligations (2)	337,000	337,000	-
Other long-term obligations (3)	17,116,000	17,116,000	-
Total Contractual Obligations (4)	<u>17,785,000</u>	<u>17,526,000</u>	<u>259,000</u>

- (1) The Company has commitments related to a lease signed for premises in New Plymouth, New Zealand.
- (2) The Company has commitments for a drilling rig based on a default rate if the contracted number of wells are not drilled.
- (3) The Other Long Term Obligations that the Company has are in respect to the Company's share of expected exploration and development permit obligations and/or commitments at the date of this report. The Company may choose to alter the program, request extensions, reject development costs, relinquish certain permits or farm-out its interest in permits where practical.
- (4) The Company's total commitments include those that are required to be incurred to maintain its permits in good standing during the current permit term, prior to the Company committing to the next stage of the permit term where additional expenditures would be required. In addition, costs are also included that relate to commitments the Company has made that are in addition to what is required to maintain the permit in good standing.

The details of the Company's commitments shown above are as follows:

PEP 38748:

- a. \$3,388,000 relates to the remaining costs to build the Sidewinder Production Facilities and pipeline as well as acquiring lands
- b. \$828,000 relates to the permanent tie-in of the Sidewinder-2, 3 and 4 wells
- c. \$1,834,000 relates to the acquisition of 2D seismic

PMP 38156:

- a. \$9,664,000 relates to drilling of the Cheal-C2, Cheal-A8, Cheal-B5 and Cheal-B6 wells and the completion and testing of the Cheal-C1, Cheal-C2 and Cheal A8 wells.
- b. \$1,202,000 relates to the Cheal B site permanent tie-in, equipment acquired for longer term production at the Cheal C site and other plant enhancements at the Cheal production facilities.

PEP 38348: no capital commitments

PEP 38349: no capital commitments

PEP 50940: \$200,000 relates to drilling a stratigraphic well

PEP 52181: no capital commitments

The Company may also have an obligation to pay its joint venture interest share of costs to plug and abandon the unsuccessful SuppleJack and Kahili wells previously drilled. The Company expects to use working capital on hand as well as cash flow from oil and gas sales to meet these commitments.

Commitments and work programs are subject to change.

Liquidity and Capital Resources

At September 30, 2011, the Company had \$60,909,232 (2011: \$23,959,138) in cash and cash equivalents and \$57,939,393 (2011: \$22,565,200) in working capital. As of the date of this report the Company is adequately funded to meet its capital and ongoing requirements for the next twelve months based on the current exploration and development programs, the farmout agreement entered into with Apache Corporation and anticipated revenue from the Cheal and Sidewinder oil and gas fields. Additional material commitments, changes to production estimates or any acquisitions by the Company may require a source of additional financing. Alternatively certain permits may be farmed-out, sold or relinquished.

Please refer to subsequent events for additional information.

Use of Proceeds

On May 5, 2010, the Company closed an equity offering with net proceeds of \$18,711,150. The Company's intended use of the net proceeds in the short form prospectus is outlined below:

Property	Operation	Anticipated use of proceeds in Short Form Prospectus, including over-allotment	Current anticipated use of proceeds	Status of operation
Taranaki Basin:				
PMP 38156	Optimization; Phase 2	\$500,000	\$1,500,000	Completed
	Drill five Cheal wells	9,500,000	7,000,000	Changed Program
	Drill three Cheal wells	-	7,000,000	Completed
	Complete and test three wells	-	2,500,000	Completed – two wells
PEP 38748	Drill one exploration well	2,500,000	2,500,000	Completed
	Complete and test well	-	800,000	Completed -
East Coast Basin				
PEP 50940:	Seismic	350,000	-	Changed Program
	Drill up to eight orientated core wells	-	72,000	Completed
PEP 38348:	Drill two stratigraphic wells	250,000	513,000	Completed
	Drill one stratigraphic well	250,000	329,000	Completed
PEP 38349:	Drill one exploration well	2,500,000	-	Changed Program
Working capital		2,861,150	3,497,150	
Total		\$18,711,150	\$27,711,150	

- (1) The Company's phase 2 optimization program at Cheal included the workover of the Cheal B3 well and an additional workover on Cheal-1 to re-enter the well and finalize the downhole configuration for permanent Urenui Formation production.
- (2) The initial use of proceeds estimated for PMP 38156 and PEP 38748 drilling was an estimate of dry hole cost only due to the exploratory nature of the wells at that time. The actual use of proceeds for three wells included dry hole, completion and testing of the three wells drilled.
- (3) The Company drilled eight orientated core wells in permit PEP 50940 rather than undertaking the seismic survey originally planned.
- (4) On September 2, 2011, the Company entered into a farmout agreement with Apache Corporation. Related to PEP 38348, 38349 and 50940.

The Company completed an equity offering on November 26, 2010 for net proceeds of \$56,353,740. The Company's intended use of the net proceeds in the short form prospectus is outlined below:

Property	Operation	Anticipated use of proceeds in Short Form Prospectus, including over-allotment	Current anticipated use of proceeds	Status of operation	
Taranaki Basin: PMP 38156	Drill three vertical wells	\$ 7,500,000	7,500,000	2011 – completed 2 wells	
	Complete and test three wells	-	1,800,000	2012	
	Drill two vertical wells	-	5,000,000	2012	
	Drill five horizontal wells	16,250,000	-	Changed Program	
	Optimization and water flood	2,000,000	2,000,000	2012	
PEP 38748	Drill two vertical wells	5,000,000	5,000,000	Completed	
	Drill one vertical well	-	2,500,000	Completed	
	Drill five vertical wells	-	12,500,000	2012	
	Drill five horizontal wells	16,250,000	-	Changed Program	
	Complete and test three wells	-	1,500,000	Completed	
East Coast Basin (1):	Construct production facilities, purchase land and tie-in additional wells	-	8,500,000	Completed Production station	
	PEP 50940: Drill one stratigraphic well	200,000	200,000	2012	
	PEP 38348: Drill three stratigraphic wells	Drill one exploration well	600,000	-	Changed Program
			-	-	Changed Program
	PEP 38349: Drill one stratigraphic well	200,000	-	Changed Program	
Working capital		2,066,400	9,853,740		
Total		\$50,066,400	\$56,353,740		

(1) On September 2, 2011, the Company entered into a farmout agreement with Apache Corporation.

Please refer to the Company's final short-form prospectus filed on November 10, 2010.

Off-Balance Sheet Arrangements and Proposed Transactions

The Company has no off-balance sheet arrangements or proposed transactions.

Related Party Transactions

The Company was not involved in any other related party transaction during the period ended September 30, 2011, outside of paying wages, director fees and consulting fees. Consulting fees were paid to an insider for advisory services related primarily to financing, budgeting and capital expenditure programs relating to the Company's plan of operations.

Please refer to Note 5 of the accompanying condensed consolidated interim financial statements.

Subsequent Events

On Nov 3, 2011, the Company applied for a second term on PEP 38348 and PEP 38349 which also includes a requirement for the Company to relinquish a total of 832,000 acres of land upon acceptance of the second term.

Share Capital:

Subsequent to September 30, 2011 and to the date of this report 44,000 options and 3,267,210 warrants were exercised for proceeds of \$65,440 and \$11,761,956, respectively.

The Company has one class of common shares. As at September 30, 2011, there were 51,132,024 common shares outstanding and at November 14, 2011, there were 54,443,234 common shares outstanding.

No class A or class B preference shares have been issued.

The Company has a stock option plan. As at November 14, 2011, there were 3,215,286 stock options outstanding, of which 1,536,952 have vested.

Please refer to Notes 8 and 13 of the accompanying condensed consolidated interim financial statements.

Critical Accounting Estimates

The preparation of the condensed consolidated interim financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, expenses and the disclosure of contingencies. Such estimates primarily relate to unsettled transactions and events as of the date of the condensed consolidated interim financial statements. These estimates are subject to measurement uncertainty. Actual results could differ from and affect the results reported in these condensed consolidated interim financial statements.

Fair values of oil and gas properties, depletion and depreciation and amounts used in impairment calculations are based on estimates of crude oil and natural gas reserves and the related future costs required to develop those reserves. By nature, estimates of reserves and the related future cash flows are subject to measurement uncertainty, and the impact of differences between actual and estimated amounts on the condensed consolidated interim financial statements of future periods could be material.

Petroleum and natural gas properties, exploration and evaluation assets and other corporate assets are aggregated into cash generating units ("CGUs") based on their ability to generate largely independent cash flows and are used for impairment testing. The determination of the Company's CGUs is subject to managements judgement.

The decision to transfer exploration and evaluation assets to property plant and equipment is based on managements determination of that area's technical feasibility and commercial viability.

The calculation of asset retirement obligations includes estimates of the future costs to settle the asset retirement obligation, the timing of cash flows to settle the obligation, the risk free rate and future inflation rates. The impact of differences between actual and estimated costs, timing and inflation on the condensed consolidated interim financial statements of future periods may be material.

The estimated fair value of the Company's financial assets and liabilities, are by their nature, subject to measurement uncertainty.

The calculation of income taxes requires judgement in applying tax laws and regulations, estimating the timing of the reversals of temporary differences, and estimating the realizability of future tax assets. These estimates impact current and future income tax assets and liabilities, and current and future income tax expense (recovery).

The calculation of stock-based compensation requires estimates of volatility, forfeiture rates and market prices surrounding the issuance of stock options. These estimates impact stock-based compensation expense and contributed surplus.

Contingencies are resolved only when one or more events transpire. As a result, the assessment of contingencies inherently involve estimating the outcome of future events.

Business Risks and Uncertainties

The Company, like all companies in the international oil and gas sector, is exposed to a variety of risks which include title to oil and gas interests, the uncertainty of finding and acquiring reserves, funding and developing those reserves and finding storage and markets for them. In addition there are commodity price fluctuations, interest and exchange rate changes and changes in government regulations. The oil and gas industry is intensely competitive and the Company must compete against companies that have larger technical and financial resources. The Company works to mitigate these risks by evaluating opportunities for acceptable funding, considering farm-out opportunities that are available to the Company, operating in politically stable countries, aligning itself with joint venture partners with significant international experience and by employing highly skilled personnel. The Company also maintains a corporate insurance program consistent with industry practice to protect against losses due to accidental destruction of assets, well blowouts and other operating accidents and disruptions. The oil and gas industry is subject to extensive and varying environmental regulations imposed by governments relating to the protection of the environment and the Company is committed to operate safely and in an environmentally sensitive manner in all operations. Please also refer to Forward Looking Statements.

Changes in Accounting Policies including Initial Adoption

Please refer to Note 2 of the accompanying condensed consolidated interim financial statements.

New Accounting Pronouncements

Please refer to Note 2 of the accompanying condensed consolidated interim financial statements.

International Financial Reporting Standards

Effective January 1, 2011, International Financial Reporting Standards ("IFRS") have replaced Canadian GAAP for publically accountable enterprises. TAG has adopted IFRS for the interim and annual periods beginning April 1, 2011 including comparative information pertaining to 2010. The six months ended September 30, 2011 is the Company's first reporting period under IFRS.

As a result, the Company has prepared its first condensed consolidated interim financial statements for the first quarter of the Company's first IFRS annual consolidated financial statements. IFRS represents standards and interpretations approved by the International Accounting Standards Board ("IASB") and are comprised of IFRS's, International Accounting Standards ("IAS"), and interpretations issued by the IFRS Interpretations Committee ("IFRICs") or the former Standing Interpretations Committee ("SICS"). The Company's condensed consolidated interim financial statements as at and for the six months ended September 30, 2011 have been prepared in accordance with IAS 34 – Interim Financial Reporting and on the basis of IFRS standards and interpretations expected to be effective as at the Company's first IFRS annual reporting date March 31, 2012, with significant accounting policies as described in Note 2 of the Company's condensed consolidated interim financial statements as at and for the six months ended September 30, 2011.

The Company has now substantially completed its IFRS changeover plan, with just the post-implementation phase remaining.

Information regarding the Company's accounting policies and transition to IFRS can be found in Notes 2 and 15 to the Condensed Consolidated Interim Financial Statements.

Transitional Financial Impact

Equity Impact

As a result of accounting policy choices selected and changes that were required under IFRS, the Company has recorded a reduction in shareholders' equity of \$579,373 as at September 30, 2010. The table below outlines adjustments to shareholders' equity on adoption of IFRS on April 1, 2010, March 31, 2011 and September 30, 2010.

	September 30, 2010	March 31, 2011	April 1, 2010
Total shareholder's equity reported under Canadian GAAP	\$ 35,969,435	\$ 95,147,320	\$ 17,364,374
Foreign exchange translation	(340,274)	(567,533)	-
Total shareholder's equity reported under IFRS	\$ 35,629,161	\$ 94,579,787	\$ 17,364,374

Comprehensive Income Impact

As a result of accounting policy choices selected and changes that were required to be made under IFRS, the Company has recorded a decrease in total comprehensive loss of \$14,949 for the six months ended September 30, 2010 and an increase in total comprehensive loss of \$637,141 for the year ended March 31, 2011, respectively. The following is a summary of the adjustments to comprehensive income for the six months ended September 30, 2010 and the year ended March 31, 2011 under IFRS.

	Six months ended September 30, 2010	Year ended March 31, 2011
Total comprehensive income (loss) as reported under Canadian GAAP	\$ (437,557)	\$ (207,748)
Stock based compensation	14,959	(637,141)
Total comprehensive loss as reported under IFRS	\$ (422,598)	\$ (844,889)

Cash Flow Impact

The transition from Canadian GAAP to IFRS resulted in reclassifications of various amounts, within operating activities, on the statements of cash flows; however, as there have been no adjustments to net cash flows, no reconciliation of the statement of cash flows has been presented.

Internal Control Activities

For all changes to policies and procedures that have been identified, the effectiveness of internal controls over financial reporting and disclosure controls and procedures have been assessed and any changes have been implemented. In addition, controls over the IFRS changeover process have been implemented, as necessary. The Company has identified and implemented the required accounting process changes that resulted from the application of IFRS accounting policies and these changes were not significant. The Company has completed the design and implementation of the changes to internal controls over financial reporting resulting from the application of IFRS accounting policies. The existing control framework has been applied to the IFRS changeover process. All accounting policy changes, transitional exemption elections and transitional financial position impacts were subject to review by the Company's expert advisors, senior management and the Audit Committee of the Board of Directors.

Information Technology and Systems

The IFRS transition project did not have a significant impact on information systems for the transition periods, nor is it expected that significant changes are required in the post-transition periods.

Post Implementation

The post-implementation phase will involve continuous monitoring of changes in IFRS in future periods.

The IASB continues to amend and add to current IFRS standards and interpretations with several projects underway. Accordingly, the accounting policies adopted by the Company for the Company's first IFRS annual consolidated financial statements for the year ended March 31, 2012 may differ from the significant accounting policies used in the preparation of the Company's condensed consolidated interim financial statements as at the six months ended September 30, 2011. However, as at the date of this document, the Company does not expect any of the IFRS standard developments to have a significant impact on its 2012 year end consolidated financial statements.

Management's report on Internal Control over Financial Reporting

The Company's management is responsible for establishing and maintaining adequate internal control over financial reporting. Any system of internal control over financial reporting, no matter how well designed, has inherent limitations. Therefore, even those systems determined to be effective can only provide assurance with respect to financial statement preparation and presentation.

The changeover from Canadian GAAP to International Financial Reporting Standards has had a pervasive effect on the financial statements of the Company. Management considers the controls implemented since the announcement of the changeover to IFRS to likely have a material effect on internal control over financial reporting for the periods reported under IFRS at changeover. These key controls included changeover planning, staff training, consultation with experts and systematic analysis of standard differences. However, as these controls were implemented before the changeover date, it is management's conclusion that there have been no changes in the Company's internal control over financial reporting during the six months ended September 30, 2011, that have materially affected, or are reasonably likely to materially affect, its internal control over financial reporting.

Additional information relating to the Company is available on Sedar at www.sedar.com.

Notes to the Condensed Consolidated Interim Financial Statements
Six Months Ended September 30, 2011
Expressed in Canadian Dollars
Unaudited

Note 1 – Nature of Operations

The Company is incorporated under the Business Corporations Act (British Columbia) and its major activity is the development and exploration of international oil and gas properties.

The Company is in the process of exploring, developing and producing from its oil and gas properties and has two oil and gas properties that contain reserves that are economically recoverable. The success of the Company's exploration and development of its oil and gas properties requires significant additional exploration and development activities to establish additional proved reserves and to commercialize its oil and gas exploration properties. The Company is also influenced by significant financial risks as well as commodity prices. In addition, the Company will use cash and operating cash flow to further explore and develop its properties towards planned principal operations. The Company monitors its cash and cash equivalents and adjusts its expenditure plans to conform to available funding. The Company plans to fund exploration and development activities through existing cash resources.

Note 2 – Accounting Policies and Basis of Presentation

Basis of presentation

These condensed consolidated interim financial statements have been prepared in accordance with IAS 34, Interim Financial Reporting ("IAS 34"), as issued by the International Accounting Standards Board, and its interpretations. Accordingly, these condensed consolidated interim financial statements do not include all of the information and footnotes required by International Financial Reporting Standards ("IFRS") for complete financial statements for yearend reporting purposes. Results for the period ended September 30, 2011, are not necessarily indicative of future results.

These are the Company's second IFRS condensed consolidated interim financial statements for part of the period covered by the first IFRS consolidated annual financial statements to be presented in accordance with IFRS for the year ending March 31, 2012. Previously, the Company prepared its consolidated annual and consolidated interim financial statements in accordance with Canadian generally accepted accounting principles ("Canadian GAAP").

These condensed consolidated interim financial statements have been prepared on a historical cost basis except for financial instruments classified as available-for-sale, which are stated at their fair value. In addition these condensed consolidated interim financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

The accounting policies set out below have been applied consistently to all periods presented in preparing the opening balance sheet at April 1, 2010 (Note 15) for purposes of transition to IFRS. The accounting policies have been applied consistently by the Company and its subsidiaries

Foreign Currency translation

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates ("the functional currency"). The Group's entities' functional currencies are the Canadian Dollar and the New Zealand Dollar. The condensed consolidated financial statements are presented in Canadian Dollars which is the Group's presentation currency.

Transactions in currencies other than the functional currency are recorded at the rates of exchange prevailing on dates of transactions. Monetary assets and liabilities that are denominated in foreign currencies are translated at the rates prevailing at each reporting date. Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are retranslated to the functional currency at the exchange rate at the date the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated. Foreign currency translation differences are recognized in profit or loss, except for differences on the retranslation of available-for-sale instruments which are recognized in other comprehensive income.

For the purpose of presenting consolidated financial statements, the assets and liabilities of the Company's foreign operations are expressed in Canadian dollars using closing rates at the date of financial position. Income and expense items are translated at the average exchange rates for the period. Exchange differences arising, if any, are recognized directly into equity and transferred to the foreign currency translations reserve. Such exchange differences are recognized in profit or loss in the period in which the foreign operation is disposed of.

Cash and Cash Equivalents

Cash and cash equivalents include term investments with maturities of twelve months or less, together with accrued interest thereon, which are readily convertible to known amounts of cash.

Basis of consolidation

These condensed consolidated interim financial statements include the accounts of the Company and its subsidiaries. All material intercompany transactions and balances are eliminated on consolidation.

The Company's subsidiaries are:

Name of Subsidiary	Place of Incorporation	Proportion of Ownership Interest	Principal Activity
TAG Oil (NZ) Limited	New Zealand	100%	Oil and Gas Exploration
Cheal Petroleum Limited	New Zealand	100%	Oil and Gas Exploration
TAG Oil (Offshore) Limited	New Zealand	100%	Oil and Gas Exploration
Eastern Petroleum Limited	New Zealand	100%	Oil and Gas Exploration
Orient Petroleum Limited	New Zealand	100%	Oil and Gas Exploration
Trans Orient Petroleum Limited	Canada	100%	Oil and Gas Exploration
DLJ Management Services Limited	Canada	100%	Oil and Gas Exploration

Significant Accounting Estimates

The preparation of the condensed consolidated interim financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, expenses and the disclosure of contingencies. Such estimates primarily relate to unsettled transactions and events as of the date of the condensed consolidated interim financial statements. These estimates are subject to measurement uncertainty. Actual results could differ from and affect the results reported in these condensed consolidated interim financial statements.

Fair values of oil and gas properties, depletion and depreciation and amounts used in impairment calculations are based on estimates of crude oil and natural gas reserves, oil and gas prices and future costs required to develop those reserves. By nature, estimates of reserves and the related future cash flows are subject to measurement uncertainty, and the impact of differences between actual and estimated amounts on the consolidated financial statements of future periods could be material.

Petroleum and natural gas properties, exploration and evaluation assets and other corporate assets are aggregated into cash-generating-units (CGUs) based on their ability to generate largely independent cash flows and are used for impairment testing. The determination of the Company's CGUs is subject to management's judgment.

The decision to transfer exploration and evaluation assets to property, plant and equipment is based on management's determination of an area's technical feasibility and commercial viability based on proved and probable reserves.

The calculation of decommissioning liabilities includes estimates of the future costs to settle the liability, the timing of the cash flows to settle the liability, the risk-free rate and the future inflation rates. The impact of differences between actual and estimated costs, timing and inflation on the condensed consolidated interim financial statements of future periods may be material.

The estimated fair value of the Company's financial assets and liabilities, are by their nature, subject to measurement uncertainty.

The calculation of income taxes requires judgment in applying tax laws and regulations, estimating the timing of the reversals of temporary differences, and estimating the reliability of future tax assets. These estimates impact current and future income tax assets and liabilities, and current and future income tax expense (recovery).

The calculation of stock-based compensation requires estimates of volatility, forfeiture rates and market prices surrounding the issuance of stock options. These estimates impact stock-based compensation expense and share-based payment reserve.

Contingencies are resolved only when one or more events transpire. As a result, the assessment of contingencies inherently involves estimating the outcome of future events.

Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument to another entity. Financial assets and financial liabilities are recognized on the consolidated statement of financial position at the time the Company becomes a party to the contractual provisions. Upon initial recognition, financial instruments are measured at fair value. Measurement in subsequent periods is dependent on the classification of the financial instrument. These instruments will be classified into one of the following five categories: fair value through profit or loss, held-to-maturity, loans and receivables, available-for-sale or financial liabilities at amortized cost.

i) Financial assets and liabilities at fair value through profit or loss

Financial assets and liabilities at fair value through profit or loss are measured at fair value with changes in fair value recognized in net income (loss). Cash and cash equivalents are designated at fair value through profit or loss.

ii) Held-to-maturity

Held-to-maturity investments are measured at amortized cost at the settlement date using the effective interest method of amortization.

iii) Loans and receivables

Loans and receivables are financial assets with fixed or determinable payments that are not quoted in an active market. After initial measurement, these assets are measured at amortized cost at the settlement date using the effective interest method of amortization. Accounts receivable and income tax receivable are classified as loans and receivables.

iv) Available-for-sale

Available-for-sale financial assets are instruments that are classified in this category or not classified in any other category. They are measured at fair value at the settlement date, with changes in the fair value recognized in other comprehensive income. The Company's investment in equity securities are classified as available-for-sale.

v) Financial liabilities at amortized cost

These financial liabilities are measured at amortized cost at the settlement date using the effective interest method of amortization. Accounts payable and accrued liabilities are classified as financial liabilities at amortized cost.

The Company has financial instruments in the form of equity securities that give rise to other comprehensive income. Instruments are classified as current if they are assumed to be settled within one year, otherwise they are classified as non-current. The Company will assess at each reporting period whether there is any objective evidence that a financial asset, other than those measured at fair value, is impaired. When assessing impairment, the carrying value of financial assets carried at amortized cost is compared to the present value of estimated future cash flows, discounted using the instrument's original effective interest rate.

Exploration and evaluation costs

All costs directly associated with petroleum and natural gas reserves are initially capitalized. Exploration and evaluation costs are those expenditures for an area where technical feasibility and commercial viability has not yet been determined. These costs include costs to acquire acreage and exploration rights, geological and geophysical costs, asset retirement costs, exploration and evaluation drilling, sampling and appraisals. Costs incurred prior to acquiring the legal rights to explore an area are charged directly to net earnings as exploration and evaluation expense.

When an area is determined to be technically feasible and commercially viable through the granting of a mining permit, the accumulated costs are transferred to property, plant and equipment. When an area is determined not to be technically feasible and commercially viable or the Company decides not to continue with its activity, the unrecoverable costs are charged to net earnings as exploration and evaluation expense.

Property, plant and equipment

All costs directly associated with the development of petroleum and natural gas reserves are capitalized on an areaby area basis. Development costs include expenditures for areas where technical feasibility and commercial viability has been determined through the granting of a mining permit. These costs include proved property acquisitions, development drilling, completion, gathering and infrastructure, decommissioning costs and transfers of exploration and evaluation assets.

Costs accumulated within each area are depleted using the unit-of-production method based on proved and probable reserves using estimated future prices and costs. Costs subject to depletion include estimated future costs to be incurred in developing proved and probable reserves.

For property dispositions, a gain or loss is recognized in net earnings. Exchanges of properties are measured at fair value, unless the transaction lacks commercial substance or fair value cannot be reliably measured. Where the exchange is measured at fair value, a gain or loss is recognized in net earnings.

Corporate assets consist primarily of office equipment and leasehold improvements and are stated at cost less accumulated depreciation. Depreciation of these corporate assets is calculated using the declining-balance method.

Impairment of non-financial assets

The carrying value of the Company's non-financial assets is reviewed at each reporting date for indicators that the carrying value of an asset or CGU may not be recoverable. These indicators include, but are not limited to, extended decreases in prices or margins for oil and gas commodities or products, a significant downward revision in estimated reserves or an upward revision in future development costs. If indicators of impairment exist, the recoverable amount of the asset or CGU is estimated. If the carrying value of the asset or CGU exceeds the recoverable amount, the asset or CGU is written down with an impairment recognized in net earnings.

Exploration and evaluation costs and property, plant and equipment costs are aggregated into CGUs based on their ability to generate largely independent cash flows. The recoverable amount of an asset or CGU is the greater of its fair value less costs to sell and its value in use. Fair value less cost to sell is determined to be the amount for which the asset could be sold in an arm's length transaction, less the costs of disposal. Value in use is determined by estimating the present value of the future net cash flows expected to be derived from the continued use of the asset or CGU.

Reversals of impairments are recognized when there has been a subsequent increase in the recoverable amount. In this event, the carrying amount of the asset or CGU is increased to its revised recoverable amount with an impairment reversal recognized in net earnings. The recoverable amount is limited to the original carrying amount less depletion and depreciation as if no impairment had been recognized for the asset or CGU for prior periods.

Asset retirement obligations

Asset retirement obligations include present obligations where the Company will be required to retire tangible long-lived assets such as producing well sites and facilities. The asset retirement obligations are measured at the present value of the expenditure expected to be incurred using a risk-free discount rate. The associated asset retirement obligation is capitalized as part of the cost of the related long-lived asset. Changes in the estimated liability resulting from revisions to estimated timing, amount of cash flows, or changes in the discount rate are recognized as a change in the asset retirement obligation and the related decommissioning cost.

Increases in asset retirement obligations resulting from the passage of time are recorded as accretion of asset retirement obligations in the consolidated statement of comprehensive income. Actual expenditures incurred are charged against the asset retirement obligation liability as incurred.

Share-based payments

Obligations for issuance of common shares under the Company's stock-based compensation plan are accrued over the vesting period using fair values. Fair values are determined at issuance using the Black-Scholes option-pricing model, taking into account a nominal forfeiture rate, and are recognized as stock-based compensation with a corresponding credit to contributed surplus.

Contingencies

When a contingency is substantiated by confirming events, can be reliably measured and will likely result in an economic outflow, a liability is recognized in the consolidated financial statements as the best estimate required to settle the obligation. A contingent liability is disclosed where the existence of an obligation will only be confirmed by future events, or where the amount of a present obligation cannot be measured reliably or will likely not result in an economic outflow. Contingent assets are only disclosed when the inflow of economic benefits is probable. When the economic benefit becomes virtually certain, the asset is no longer contingent and is recognized in the consolidated financial statements.

Income tax

Income tax expense is comprised of current and deferred tax. Income tax is recognized in the statement of income except to the extent that it relates to items recognized directly in equity, in which case the income tax is also recognized directly in equity.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted, or substantively enacted, at the end of the reporting period, and any adjustment to tax payable in respect of previous years.

In general, deferred tax is recognized in respect of temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. Deferred income tax is determined on a non-discounted basis using tax rates and laws that have been enacted or substantively enacted at the balance sheet date and are expected to apply when the deferred tax asset or liability is settled. Deferred tax assets are recognized to the extent that it is probable that the assets can be recovered.

Deferred income tax is provided on temporary differences arising on investments in subsidiaries and associates, except, in the case of subsidiaries, where the timing of the reversal of the temporary difference is controlled by the Company and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred income tax assets and liabilities are presented as non-current. Tax on income in interim periods is accrued using the tax rate that would be applicable to expected total annual earnings.

Revenue

Revenue is recognized when it is probable that the economic benefits will flow to the Company and delivery has occurred, the sales price is fixed or determinable, and collectability is reasonably assured. These criteria are generally met at the time the product is shipped and delivered to the customer and, depending on the delivery conditions, title and risk have passed to the customer and acceptance of the product, when contractually required, has been obtained. Revenue is measured based on the price specified in the sales contract.

Earnings / loss per share

Basic earnings per share ("EPS") is calculated by dividing the net earnings (loss) for the period attributable to equity owners of TAG Oil by the weighted average number of common shares outstanding during the period.

Diluted EPS is not presented when it is anti-dilutive.

Diluted EPS is calculated by adjusting the weighted average number of common shares outstanding for dilutive instruments. The number of shares included with respect to options, warrants and similar instruments is computed using the treasury stock method. TAG Oil's potentially dilutive common shares comprise stock options granted to employees and directors, and warrants.

Future Changes in Accounting Policies

International Financial Reporting Standard 9, *Financial Instruments* (“IFRS 9”), was issued in November 2009. It addresses classification and measurement of financial assets and financial liabilities and replaces the multiple category and measurement models in IAS 39 for debt instruments with a new mixed measurement model having only two categories: Amortized cost and fair value through profit or loss. IFRS 9 also replaces the models for measuring equity instruments and such instruments are either recognized at fair value through the profit or loss or at fair value through other comprehensive income. Where such equity instruments are measured at fair value through other comprehensive income, dividends, to the extent not clearly representing a return on investment, are recognized in profit or loss; however, other gains and losses (including impairments) associated with such instruments remain in accumulated comprehensive income indefinitely. This standard is required to be applied for accounting periods beginning on or after January 1, 2013, with earlier adoption permitted. The Company has not yet assessed the impact of the standard or determined whether it will adopt early.

IFRS 7 *Financial instruments - Disclosures* (“IFRS 7”) was amended by the IASB in October 2010 and provides guidance on identifying transfers of financial assets and continuing involvement in transferred assets for disclosure purposes. The amendments introduce new disclosure requirements for transfers of financial assets including disclosures for financial assets that are not derecognized in their entirety, and for financial assets that are derecognized in their entirety but for which continuing involvement is retained. The amendments to IFRS 7 are effective for annual periods beginning on or after July 1, 2011. The Company has not yet determined the impact of the amendments to IFRS 7 on its financial statements.

IFRS 10 *Consolidated Financial Statements* (“IFRS 10”) provides a single model to be applied in the control analysis for all investees, including entities that currently are special purpose entities in the scope of SIC 12. In addition, the consolidation procedures are carried forward substantially unmodified from IAS 27 *Consolidated and Separate Financial Statements*. This standard is effective for annual period beginning on January 1, 2013. Earlier application is permitted. The Company has not yet determined the impact of the amendments to IFRS 10 on its financial statements.

IFRS 11 *Joint Arrangements* (“IFRS 11”) replaces the guidance in IAS 31 *Interests in Joint Ventures*. Under IFRS 11, joint arrangements are classified as either joint operations or joint ventures. IFRS 11 essentially carves out of previous jointly controlled entities, those arrangements which although structured through a separate vehicle, such separation is ineffective and the parties to the arrangement have rights to the assets and obligations for the liabilities and are accounted for as joint operations in a fashion consistent with jointly controlled assets/operations under IAS 31. In addition, under IFRS 11 joint ventures are stripped of the free choice of equity accounting or proportionate consolidation; these entities must now use the equity method.

Upon application of IFRS 11, entities which had previously accounted for joint ventures using proportionate consolidation shall collapse the proportionately consolidated net asset value (including any allocation of goodwill) into a single investment balance at the beginning of the earliest period presented. The investment’s opening balance is tested for impairment in accordance with IAS 28 *Investments in Associates* and IAS 36 *Impairment of Assets*. Any impairment losses are recognized as an adjustment to opening retained earnings at the beginning of the earliest period presented. The Company intends to adopt IFRS 11 in its financial statements for the annual period beginning on January 1, 2013. The Company has not yet determined the impact of the amendments to IFRS 11 on its financial statements.

IFRS 12: *Disclosure of Interests in Other Entities* - In May 2011, the IASB issued IFRS 12 which aggregates and amends disclosure requirements included within other standards. The standard requires a company to provide disclosures about subsidiaries, joint arrangements, associates and unconsolidated structure entities. The standard is required to be adopted for periods beginning January 1, 2013. The Company is currently evaluating the impact that the standard may have on its financial statements.

IFRS 13 *Fair Value Measurement* (“IFRS 13”) converges IFRS and US GAAP on how to measure fair value and the related fair value disclosures. The new standard creates a single source of guidance for fair value measurements, where fair value is required or permitted under IFRS, by not changing how fair value is used but how it is measured. The focus will be on an exit price. IFRS 13 is effective for annual periods beginning on or after January 1, 2013, with early adoption permitted. The Company has not yet determined the impact of the amendments to IFRS 13 on its financial statements.

IAS 1: *Presentation of Items of Other Comprehensive Income* – In June 2011, the IASB issued amendments to IAS 1 *Presentation of Financial Statements* to split items of other comprehensive income (OCI) between those that are reclassified to income and those that are not. The standard is required to be adopted for periods beginning on or after July 1, 2012. The Company is currently evaluating the impact that the standard may have on its financial statements.

The Company's oil and gas properties are located in New Zealand and its interests in these properties are maintained pursuant to the terms of exploration and mining permits granted by the national government. The Company is satisfied that evidence supporting the current validity of these permits is adequate and acceptable by prevailing industry standards in respect to the current stage of exploration on these properties.

Net book value			
April 1, 2010	\$ 7,657,833	\$ 212,076	\$ 7,869,909
March 31, 2011	\$ 16,926,056	\$ 343,013	\$ 17,269,069
September 30, 2011	\$ 23,441,234	\$ 504,253	\$ 23,945,487

During the period ended September 30, 2011, the Company entered into a land acquisition agreement to purchase the property that its Sidewinder discovery is located on, PEP38748. Purchase price is approximately NZ\$3.1 million and a deposit of NZ\$300,000 has been paid in accordance with the agreement.

The Company's oil and gas properties are located in New Zealand and its interests in these properties are maintained pursuant to the terms of exploration and mining permits granted by the national government. The Company is satisfied that evidence supporting the current validity of these permits is adequate and acceptable by prevailing industry standards in respect to the current stage of exploration on these properties.

Note 5 – Related Party Transactions

The Company is of the view that the amounts incurred for services provided by related parties approximates what the Company would incur to arms-length parties for the same services.

The Company paid all directors, on a consolidated basis, compensation of \$113,000 (2010 - \$57,500).

The Company paid \$42,000 (2010 - \$nil) in rent to a private company owned by a Director of the Company.

Note 6 – Investments

	September 30,		March 31,	
	Number of	2011	Number of	2011
	Common	Market	Common	Market
	Shares Held	Value	Shares Held	Value
Equity securities available for sale	4,373,734	\$ 581,866	4,373,734	\$ 914,554

Note 7 – Asset retirement obligations

The following is a continuity of asset retirement obligations for the six months ended September 30, 2011:

Balance at March 31, 2011	\$ 3,913,478
Accretion expense	104,289
Foreign exchange movement	290,301
Balance at September 30, 2011	\$ 4,308,068

The Company's asset retirement obligations result from net ownership interests in petroleum and natural gas development activity. The Company estimates the total undiscounted amount of cash flows required to settle its asset retirement obligations to be approximately \$4,332,425 which will be incurred between 2013 and 2024.

The fair value of the liability for the Company's asset retirement obligation is recorded in the period in which it is incurred, using an inflation rate of 3% and discounted to its present value using a credit adjusted risk free rate of 3.5% and the corresponding amount is recognized by increasing the carrying amount of the oil and gas properties. The liability is accreted each period and the capitalized cost is depreciated over the useful life of the related asset using the unit-of-production method.

Note 8 – Share Capital

a) Authorized and Issued Share Capital

The authorized share capital of the Company consists of an unlimited number of common shares without par value.

	Number of Shares	Amount	Share-based Payment Reserve
Issued and fully paid:			
Balance at March 31, 2011	49,976,062	\$ 152,908,074	\$ 3,547,025
Exercise of stock options	568,762	1,035,567	-
Fair value of stock options exercised	-	459,583	(459,583)
Exercise of warrants	587,200	2,113,920	-
Stock based compensation	-	-	3,821,076
Balance at September 30, 2011	51,132,024	\$ 156,517,144	\$ 6,908,518

b) Incentive Stock Options

The Company has a stock option plan for the granting of stock options to directors, employees and service providers. Under the terms of the stock option plan, the number of shares reserved for issuance as share incentive options will be equal to 10% of the Company's issued and outstanding shares at any time. The exercise price of each option equals the market price of the Company's shares the day prior to the date that the grant occurs less any applicable discount approved by the Board of Directors and per the guidelines of the TSX Venture Exchange. The options maximum term is five years and must vest over a minimum of eighteen months.

The following is a continuity of outstanding stock options:

	Number of Options	Weighted Average Exercise Price
Balance at March 31, 2011	3,228,048	\$ 4.03
Granted	600,000	6.15
Exercised	(568,762)	1.82
Balance at September 30, 2011	3,259,286	\$ 4.80

The following summarizes information about stock options that are outstanding at September 30, 2011:

Number of Shares	Price per Share	Weighted Average Remaining Contractual Life	Expiry Date	Options Exercisable
105,357	\$1.38	0.05	March 14, 2013	105,357
71,429	\$2.27	0.04	June 26, 2013	71,429
75,500	\$1.26	0.07	October 28, 2014	75,500
318,000	\$1.25	0.30	October 28, 2014	318,000
100,000	\$2.90	0.10	February 9, 2015	100,000
9,000	\$2.41	0.01	April 1, 2015	9,000
75,000	\$2.65	0.09	August 16, 2015	50,000
650,000	\$2.60	0.79	September 9, 2015	433,333
1,255,000	\$7.15	1.68	February 8, 2016	418,333
100,000	\$5.82	0.14	May 2, 2016	-
500,000	\$6.15	0.73	July 5, 2016	-
3,259,286		4.00		1,580,952

On July 5, 2011, the Company granted 500,000 stock options to certain directors and officers pursuant to its incentive stock option plan. These new options are exercisable at \$6.15 per share until July 5, 2016 and will vest over a period of eighteen months.

During the period ended September 30, 2011, 568,762 stock options were exercised for \$1,035,565.

The Company applies the Black-Scholes option pricing model using the closing market prices on the grant dates and to date the Company has calculated option benefits using a volatility ratio of 75% and a risk free interest rate of 2.5% to calculate option benefits. The fair value of the option benefit is amortized over the vesting period of the options, generally being eighteen months.

c) Share Purchase Warrants

The following is a continuity of outstanding share purchase warrants:

	Number of Share Purchase Warrants	Weighted Average Exercise Price	Expiry Date
Balance at March 31, 2011	3,861,950	\$3.60	November 5, 2011
Exercised	(587,200)	3.60	-
Balance at September 30, 2011	3,274,750	\$3.60	November 5, 2011

During the period ended September 30, 2011, 587,200 share purchase warrants were exercised for \$2,113,920. Subsequent to the period ended September 30, 2011, 3,267,210 warrants were exercised and 7,540 expired unexercised.

d) Income (Loss) per share

Basic weighted average shares outstanding for the six months ended September 30, 2011 was 50,228,422 (2010: 36,209,586) and diluted weighted average shares outstanding for the period was 55,230,409 (2010: 41,445,513). Stock options and share purchase warrants outstanding are not included in the computation of diluted loss per share when the inclusion of such securities would be anti-dilutive.

NOTE 9 – Accumulated Other Comprehensive Income (Loss)

	Accumulated Other Comprehensive income (loss)
Balance at March 31, 2011	\$ 281,139
Unrealized loss on investments	(332,688)
Balance at September 30, 2011	\$ (51,549)

NOTE 10 – Capital Management

The Company's primary objective for managing its capital structure is to maintain financial capacity for the purpose of sustaining the future development of the business and maintaining investor, creditor and market confidence.

The Company considers its capital structure to include shareholders' equity and working capital. Management is continually monitoring changes in economic conditions and the risk characteristics of the underlying petroleum and natural gas industry. In the event that adjustments to the capital structure are necessary, the Company may consider issuing additional equity, raising debt or revising its capital investment programs.

The Company's share capital is not subject to any external restrictions. The Company has not paid or declared any dividends since the date of incorporation, nor are any currently contemplated. There have been no changes to the Company's approach to capital management during the period.

NOTE 11 – Financial Instruments

The nature of the Company's operations expose the Company to credit risk, liquidity risk and market risk, and changes in commodity prices, foreign exchange rates and interest rates may have a material effect on cash flows, net income and comprehensive income.

This note provides information about the Company's exposure to each of the above risks as well as the Company's objectives, policies and processes for measuring and managing these risks.

The Company's risk management policies are established to identify and analyze the risks faced by the Company, to set appropriate risk limits and to monitor market conditions and the Company's activities. The Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework and policies.

a) Credit Risk

Credit risk is the risk of financial loss to the Company if counterparties do not fulfill their contractual obligations. The most significant exposure to this risk is relative to the sale of oil production. All of the Company's production is sold directly to an oil super major. The Company is paid for its oil sales within 30 days of shipment. The Company has assessed the risk of non-collection from the buyer as low due to the buyers financial condition.

Cash and cash equivalents consist of cash bank balances and short-term deposits. The Company's short-term investments are held with a Canadian chartered bank and are monitored to ensure a stable return. The Company's short-term investments currently consist of term deposits as it is not the Company's policy to utilize complex, higher-risk investment vehicles.

The carrying amount of accounts receivable and cash and cash equivalents represents the maximum credit exposure. The Company does not have an allowance for doubtful accounts as at September 30, 2011 and did not provide for any doubtful accounts. During the period ended September 30, 2011 the Company was required to write-off \$Nil (2010 – Nil). As at September 30, 2011 there were no significant amounts past due or impaired.

b) Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its work commitments and other financial obligations as they are due. The Company's approach to managing liquidity is to ensure, to the extent possible, that it will have sufficient liquidity to meet its liabilities when due without incurring unacceptable losses or risking harm to the Company's reputation.

The Company's liquidity is dependent upon maintaining its current working capital balances, operating cash flows and ability to raise funds. To forecast and monitor liquidity the Company prepares operating and capital expenditure budgets which are monitored and updated as considered necessary. Considering these circumstances and the cash balance at September 30, 2011 of \$60.9 million (March 31, 2011: \$69.4 million), the Company's liquidity risk is assessed as low. As at September 30, 2011 the Company's financial liabilities included accounts payable and accrued liabilities of \$7,539,262 (March 31, 2011: \$6,308,015).

c) Market Risk

Market risk is the risk that changes in foreign exchange rates, commodity prices and interest rates will affect the Company's cash flows, net income and comprehensive income. The objective of market risk management is to manage and control market risk exposures within acceptable limits, while maximizing returns.

d) Foreign Currency Exchange Rate Risk

Foreign currency exchange rate risk is the risk that future cash flows, net income and comprehensive income will fluctuate as a result of changes in foreign exchange rates. All of the Company's petroleum sales are denominated in United States dollars and operational and capital activities related to our properties are transacted primarily in New Zealand dollars and/or United States dollars with some costs also being incurred in Canadian dollars.

The Company currently does not have significant exposure to other currencies and this is not expected to change in the foreseeable future as the work commitments in New Zealand are expected to be carried out in New Zealand and to a lesser extent, in United States dollars.

e) Commodity Price Risk

Commodity price risk is the risk that future cash flows will fluctuate as a result of changes in commodity prices, affecting results of operations and cash generated from operating activities. Such prices may also affect the value of exploration and development properties and the level of spending for future activities. Prices received by the Company for its production are largely beyond the Company's control as petroleum prices are impacted by world economic events that dictate the levels of supply and demand. All of the Company's oil production is sold at spot rates exposing the Company to the risk of price movements.

The Company did not have any commodity price contracts in place as at or during the period ended September 30, 2011.

f) Interest Rate Risk

Interest rate risk is the risk that future cash flows will fluctuate as a result of changes in market interest rates. The Company is exposed to interest rate fluctuations on its cash and cash equivalents which bear a floating rate of interest. The risk is not considered significant.

The Company did not have any interest rate swaps or financial contracts in place during the period ended September 30, 2011 and any variations in interest rates would not have materially affected net income.

g) Fair Value of Financial Instruments

The Company's financial instruments as at September 30, 2011 included cash and cash equivalents, accounts receivable, investments and accounts payable and accrued liabilities. The fair value of the financial instruments with exception of the Company's investments, approximate their carrying amounts due to their short terms to maturity. The Company's investments are at fair value as they are recorded at market value at September 30, 2011.

Note 12 – Comparative Figures

Certain of the prior period's figures may have been reclassified in conformity with the current period's financial statement presentation.

Note 13 – Subsequent Events

Subsequent to the period ended September 30, 2011, 44,000 options and 3,267,210 warrants were exercised for proceeds of \$65,440 and \$11,761,956 respectively.

Note 14 – Segmented Information

The Company operates in one industry: petroleum exploration and production. It operates in two geographical regions, therefore information on country segments is provided as follows:

For the Six Months Ended September 30, 2011	Canada	New Zealand	Total Company
Production revenue	\$ -	\$ 13,230,278	\$ 13,230,278

Note 15 – Transition to IFRS

As stated in Note 2, these are the Company's second condensed consolidated interim financial statements for the first annual consolidated financial statements prepared in accordance with IFRS. The impacts of the transition from Canadian GAAP to IFRS on the Company's financial position and comprehensive loss are set out in this note.

The accounting policies set out in these condensed consolidated interim financial statements have been applied for the three and six months ended September 30, 2011, 2010 and for the year ended March 31, 2011.

The Company has adjusted amounts reported previously in accordance with its previous basis of accounting (Canadian GAAP). An explanation of how the transition from Canadian GAAP to IFRS has affected the Company's statement of financial position and income statement is set out in the following tables and accompanying notes.

Transition elections

In preparing the opening IFRS statement of financial position, comparative information for the three and six months ended September 30, 2011 and the financial statements for the year ended March 31, 2011, the Company has adjusted amounts reported previously in financial statements prepared in accordance with Canadian GAAP.

IFRS 1 - Business combinations

Upon transition to IFRS, a company must adjust its accounting for business combinations carried out prior to transition to comply with IFRS. IFRS 1 provides an exemption which allows companies to carry forward their Canadian GAAP accounting for business combinations prior to transition date. The Company has utilized this exemption.

IFRS 1 - Cumulative translation differences

The Company has elected to take the IFRS 1 exemption to deem cumulative translation adjustments to be zero at the date of transition to IFRS.

IFRS 1 - Reclassification within Equity section

IFRS requires an entity to present each component of equity, a reconciliation between the carrying amount at the beginning and end of the period, separately disclosing each change. The Corporation examined its "contributed surplus" account and concluded that as at the Transition Date, the entire amount of \$1,218,746 relates to "Equity settled employee benefit reserve". As a result the Corporation believes that a reclassification would be necessary in the equity section between "Contributed surplus" and the "Equity settled employee benefit reserve" accounts.

IFRS 1 – Exploration and evaluation assets

Under Canadian GAAP, the Company followed the full cost method of accounting for its oil and gas properties, whereby all costs relating to the acquisition, exploration and development of oil and gas properties are capitalized in one New Zealand cost centre.

Under IFRS, pre-exploration, exploration and evaluation and development and production expenditures are accounted for separately. The Company utilized the IFRS 1 deemed cost exemption that allowed the Company to measure its exploration and evaluation and development and production assets at the amount determined under Canadian GAAP.

IFRS 2 – Share-based payments

Upon transition to IFRS, a company must adjust its accounting for grants of shares, options or other equity instruments, made prior to the transition, in order to comply with the standards under IFRS. IFRS 1 provides an exemption that allows first-time adopters to not apply standards for share-based payments under IFRS for equity instruments that were granted prior to November 7, 2002 and equity instruments that were granted after November 7, 2002 that have vested prior to transition to IFRS. The Company has elected to utilize this exemption.

Explanation of key differences between Canadian GAAP and IFRS giving rise to adjustments in the reconciliations

a. *Functional currency and cumulative translation adjustment account*

Under Canadian GAAP, the Company determines whether a subsidiary is an integrated operation or a self-sustaining entity which determines the method of translation into the presentation currency of the consolidated entity. IFRS requires that an entity determine the functional currency of each subsidiary individually, prior to consolidation.

The Company has determined that its subsidiaries had a functional currency other than the Canadian dollar, which under Canadian GAAP had been classified as being integrated operation. Under IFRS, entities with non Canadian dollar functional currencies are translated into Canadian dollars using the current rate method (whereby all assets and liabilities are translated using the reporting date exchange rates with any gains or losses being recorded in equity).

The Company has elected to take the IFRS 1 exemption to deem cumulative translation adjustments to be zero at the date of transition to IFRS.

b. *Exploration and evaluation assets*

Under Canadian GAAP, the Company included all exploration and evaluation assets under plant, property and equipment but under IFRS, exploration and evaluation assets are separately disclosed.

c. *Share based payments*

Under Canadian GAAP and IFRS, the Company is required to measure share-based compensation related to share purchase options granted at the fair value of the options on the date of grant and to recognize such expenses over the vesting period of the options. However, under IFRS, the recognition of such expense must be done with a “graded vesting” methodology as opposed to the straight-line vesting method allowed under Canadian GAAP. In addition, under IFRS, forfeiture estimates are recognized in the period they are estimated, and are revised for actual forfeitures in subsequent periods; while under Canadian GAAP, forfeitures of awards are recognized as they occur.

As stated above, IFRS2 share-based Payment has not been applied to equity instruments that were granted prior to November 7, 2002, nor has it been applied to equity instruments granted after November 7, 2002 that vested prior to transition to IFRS.

d. *Classification of expenses by function*

Under Canadian GAAP expenses could be presented by function and nature but under IFRS 1 costs must be presented by nature or function. The Company has presented expenses by nature as a result of the transition to IFRS.

Adjustments to Statement of Cash Flows

The transition from Canadian GAAP to IFRS had no significant impact on cash flows generated by the Company except that , under IFRS, cash flows relating to interest are classified as either operating, investing or financing in a consistent manner each period. Given that the Company currently has no long-term debt and all interest earned is on cash and cash equivalents, all interest is classified as operating. Under Canadian GAAP, cash flows relating to interest payments were also classified as operating.

Reconciliation to previously reported financial statements

A reconciliation of the above noted changes is included in the following balance sheets and statements of comprehensive profit and loss of the dates noted below. The changes to the financial statements as noted below have resulted in reclassifications of various amounts, within operating activities, on the statements of cash flows; however, as there have been no adjustments to net cash flows, no reconciliation of the statement of cash flows has been presented.

Reconciliation of Assets, Liabilities and Equity at April 1, 2010:

	Canadian GAAP	Effect of transition to IFRS		IFRS
